# RESUME

## STATEMENT

I'm an experienced User Experience Designer who has worked on supporting and redesigning apps and websites for several companies of various sizes. I've worked in all aspects of UX process, from research, user and stakeholder interviews, mapping, interface design, and validation testing.

My experience in HTML, CSS and PHP, as well as working closely with web and mobile developers has helped me empathize with what information developers need to implement a design efficiently. My interest in accessibility design has helped to expand the user base of our products and make products that are easier to use for everyone.

I'm a strong arts and design professional with a Bachelor of Arts (B.A.) in Studio Arts with a concentration in Graphic Design from University of Nebraska at Omaha. My background and hobbies includes a little bit of everything design related. This includes graphic design, motion graphics, print design, furniture design, interior design, landscape design, photography and videography.

## EDUCATION & CERTIFICATES

**B.A. Studio Art**  
**University of Nebraska Omaha**  
Concentration: Graphic Design  
Minor: Art History

**Certificate – Accessibility for Web Design**  
**LinkedIn**

**Certificate – UX Foundations: Accessibility**  
**LinkedIn**

## DESIGN EMPLOYMENT

**2015 - Present**

**Client Resources, Inc.**  
**Lead User Experience Designer**

I helped define a UX process that was not existent at the time I started. My first year was spent mostly doing interface design as CRi had done, learning CRi and our customers, and gathering an understanding of what was needed for the next level. After that first year, I worked with leadership to hire a design partner who could bring experience and help define a process. Together, we were able to take on large iterative design projects for multiple multi-billion dollar companies. Many of these projects were extremely high profile projects for these companies and required months of research and validation iterations before handing off to developers.

**2010 - Present**

**Sole Proprietor**  
**Designer / Editor / Assistant**

Beginning with an interest in art and design, I quickly gained clients and grew my skill set. Through assisting other designers and my own personal contacts, I have been able to grow my own business, in just a short amount of time, to what it is today. From designing graphics, to developing websites, animation, photography, video editing, and even working on several video productions, I have been able to experience a lot and use this exposure to determine where I want to go.

**2009 - 2013**

**West Hills Church**  
**Designer / Administrative Assistant**

Though largely an administrative job, I was allowed to develop the position in to that of a designer. Developing websites, shooting and editing videos, and frequently designing print pieces were the majority of my work.

## SKILLS

- User Experience Research
- User Interface Design
- Prototyping
- Mobile App Design
- Responsive Web Design
- Accessibility Design
- Project Estimation
- Design/Developer Handoff
- Quality Assurance Testing

**8**
